Suitability as Ingredient in Food and Food Supplements

MEGGLE Product: Reta M[®]

The product is a spray-dried mixture of 50 parts Mannitol and 50 parts Hydroxypropyl methyl cellulose and is manufactured as excipients for pharmaceutical industry. The compounds conform to the relevant monographs in pharmacopoeias.

Mannitol is regarded as food additive. It conforms to all relevant current EU and German food regulations. It complies with the specification for E 421 in Regulation (EU) No. 231/2012 laying down specifications for food additives. The rules for the use of food additives (e.g. Codex Stan 192-1995, Regulation (EC) No 1333/2008) has to be considered regarding the use in food and food supplements.

Hydroxypropyl methyl cellulose is regarded as food additive. It conforms to all relevant current EU and German food regulations. It complies with the specification for E 464 in Regulation (EU) No. 231/2012 laying down specifications for food additives. The rules for the use of food additives (e.g. Codex Stan 192-1995, Regulation (EC) No 1333/2008) has to be considered regarding the use in food and food supplements.

The product can be used as compound ingredient in the production of food and for food supplement products. The both components has to be considered as "ingredients" of the final product. The use of the product for which food and food supplements regulations are applicable underlies the responsibility of the customer.
