Revision 1

Suitability as Ingredient in Food and Food Supplements

MEGGLE Products:

- Lactose Monohydrate (USP-NF / Ph. Eur. / JP): GranuLac® 70 US, GranuLac® 140 US, GranuLac® 200 US
- Anhydrous Lactose (USP-NF / Ph. Eur. / JP): DuraLac® H

The products are manufactured and typically used as excipient in pharmaceutical industry. It conforms to the monograph "Lactose Monohydrate" in pharmacopoeias.

The products in both forms (monohydrate or anhydrous) are considered as the natural occurring sugar of milk (milk sugar) and are regarded as food (dairy product or sugar). They conform to all relevant current US food regulations and are affirmed GRAS.

The products are regarding the main chemical-physical characteristics in compliance with

- Codex Alimentarius Standard 212-1999
- Chinese Standard GB 25595-2018
- US Food Chemical Codex.
- US ADPI Product Standard
- US Standard of Identity 21CFR 186.122
- German Ordinance on Milk Products

(The products are not regarded as food additive. Therefore, JECFA and other food additive standards does not exist. An INS/E-number is not assigned.)

The products can be used as ingredient in the production of food and for food supplement products. The use of the product for which food and food supplements regulations are applicable underlies the responsibility of the customer.

Best regards
