California Proposition 65
Meggle products:
- Co-processed excipients: MicroceLac® 100

Substances known to the State of California to cause cancer or birth defects or other reproductive harm are not used for the production of above mentioned products.

The above mentioned products are safe as food and as pharmaceutical excipients.

Residues and contaminates in above mentioned products are monitored. The products comply with the relevant food laws and cause no significant risk of harm when they are used.

Freundliche Grüße / Best regards

Dr. Stefan Dreiheller
