Revision 3

Aflatoxins

MEGGLE Products:

- Lactose Monohydrate (USP-NF / Ph. Eur. / JP): GranuLac® 70 US, GranuLac® 140 US, GranuLac® 200 US
- Anhydrous Lactose (USP-NF / Ph. Eur. / JP): DuraLac® H

The above mentioned products meet the requirements of
- US FDA Compliance Policy Guide sec 527.400

Therefore the product does also meet the requirements of
- Regulation (EC) No 1881/2006,
- the German "Verordnung über das Verbot der Verwendung von mit Aflatoxinen kontaminierten Stoffen bei der Herstellung von Arzneimitteln (Aflatoxin VerbotsV) vom 19. Juli 2000".

Aflatoxins are monitored according to defined sample plan.

The products mainly are lactose derived from bovine milk. Aflatoxins B and G are metabolized in cattle to aflatoxin M1. There is no evidence that Aflatoxins B and G are present in milk. Testing of these aflatoxins B and G in the products is not applicable and is not conducted.

Best regards

MEGGLE USA inc.
