Revision 3

Californian Proposition 65

MEGGLE Products:

- Lactose Monohydrate (USP-NF / Ph. Eur. / JP): GranuLac® 70 US, GranuLac® 140 US, GranuLac® 200 US
- Anhydrous Lactose (USP-NF / Ph. Eur. / JP): DuraLac® H

Proposition 65 requires businesses to provide warnings to Californians about significant exposure to chemicals that cause cancer, birth defects or other reproductive harm. Proposition 65 also prohibits California businesses to knowingly discharge significant amounts of listed chemicals into sources of drinking water.

Proposition 65 requires California to publish a list of chemicals known to cause cancer, birth defects or other reproductive harm; this list is updated at least once a year. An annual review is conducted by the manufacturer of the products to verify compliance to the [current Proposition 65 List](#).

The Proposition 65 List contains a wide range of naturally occurring and synthetic chemicals that include additives or ingredients in pesticides, common household products, drugs, dyes, or solvents.

The manufacturer does not use any of the materials listed as cancer-causing agents or reproductive toxins by the State of California per Proposition 65 as ingredients or processing aids.

The manufacturer does not knowingly discharge chemicals listed in Proposition 65 to waste streams.

Best regards
