Elemental Impurities

Ph. Eur. General Text 5.20; USP-NF General Chapter <232> and <233>; ICH Guideline Q3D(R2)

MEGGLE Products:

- Lactose Monohydrate (Ph. Eur. / USP-NF / JP): CapsuLac® 60, FlowLac® 90, FlowLac® 100, GranuLac® 70, GranuLac® 80, GranuLac® 140, GranuLac® 200, GranuLac® 230, PrismaLac® 40, SacheLac® 80, SorboLac® 400, SpheroLac® 100, Tablettose® 70, Tablettose® 80, Tablettose® 100
- Lactose Monohydrate (USP-NF / Ph. Eur. / JP): Lactose monohydrate Low Endotoxin

In the production process of the above mentioned products, the elements classified in Class 1, 2A, 2B and 3 are not intentionally added in form of metal catalysts, metal reagents etc.

Permitted concentrations limits were calculated using the Permitted Daily Exposures and assuming a daily intake of the excipients of 10 g (ICH Q3D(R2), No 7 Option 1, stated in table A.2.2). Acceptance levels were defined as 30% of the permitted concentrations.

Testing was conducted for the elements categorised as Class 1 and 2A relevant for oral route of administration according to the ICH Guideline Q3D(R2). Using bracketing principles several representative lots of the products were tested using ICP-MS method in conformance to USP-NF <233>. Testing method has been validated for the matrix of the products.

Results are mainly < LoQ and shown on the table below which is valid for all above mentioned MEGGLE products. In case of a quantifiable result, the highest value is given. All results are far below 30% of the acceptance levels for oral application. In consequence, additional controls are not required.

MEGGLE has implemented an ongoing monitoring program for elemental impurities in accordance to the regime of the initial study performed.

Best regards

MEGGLE GmbH & Co. KG

Elemental impurities – Summary Results

Ph. Eur. General Text 5.20; USP-NF General Chapter <232> and <233>; ICH Guideline Q3D(R2)

Material Name Lactose Monohydrate
 Manufacturer MEGGLE GmbH & Co. KG Megglestr. 6 – 12, 83512 Wasserburg am Inn, Germany
 Source/Type of Excipient Animal derived (Milk of bovine origin).
 Route of administration (RoA) Oral

Date of issue: 11.01.2023
