TSE / BSE-Statement

MEGGLE Product: CombiLac®

The product is a co-processed, directly compressible spray agglomerate comprising 70 % Lactose Monohydrate (Ph. Eur. / USP-NF / JP), 20 % Microcrystalline Cellulose (Ph. Eur. / USP-NF / JP) and 10 % Maize Starch (Ph. Eur. / USP-NF / JP). The monographs have undergone pharmacopoeial harmonisation.

Starting material Lactose Monohydrate (Ph. Eur. / USP-NF / JP):

The starting material complies with the Ph. Eur. General Text 5.2.8: Minimising the risk of transmitting animal spongiform encephalopathy agents via human and veterinary medicinal products. The General Text is identical with the Note for guidance EMA/410/01 rev. 3, published in the Official Journal of the European Union (2011/C 73/01).

With reference to Ph. Eur. General Text 5.2.8:

- In the light of the current scientific knowledge and irrespective of the geographical origin, bovine milk is unlikely to present any risk of TSE/BSE contamination.
- It is confirmed that the mentioned conditions regarding bovine milk derivatives are fulfilled and therefore, the products are unlikely to present any TSE/BSE risk and shall therefore be considered compliant with the Note for Guidance.

The milk is sourced from healthy animals in the same conditions as milk collected for human consumption. The sourcing of the milk is constantly, officially supervised according to EC Hygiene Regulations (EC) No 852/2004 and (EC) No 853/2004.

Besides milk, other ruminant material incl. calf rennet is not used.

Starting materials

Microcrystalline Cellulose (Ph. Eur. / USP-NF / JP) and Maize Starch (Ph. Eur. / USP-NF / JP):

The starting materials are not of animal origin.

Best regards

MEGGLE GmbH & Co. KG
