Microbial Testing Program

MEGGLE Product:

Co-processed Excipient: StarLac®

The MEGGLE Product is a co-processed, directly compressible spray agglomerate containing

- 85 % Lactose Monohydrate (Ph. Eur / USP-NF / JP) and
- 15 % Maize Starch (Ph. Eur / USP-NF / JP).

These compounds are in compliance with the respective monographs as follows:

Parameter	Lactose Monohydrate	Maize Starch
Total aerobic microbial count (TAMC)	Max. 100 CFU/g	Max. 1000 CFU/g
Total combined yeast and mold count (TYMC)	Max. 50 CFU/g	Max. 100 CFU/g
Escherichia coli	Absence in 10 g	Absence in 10 g
Salmonella spp.	Absence in 10 g	Absence in 10 g

The compound Lactose Monohydrate is manufactured and released at MEGGLE. Additional monitoring on pathogenic microorganisms is installed as follows:

Parameter	Limit	Frequency
Listeria monocytogenes	Absence in 25 g	2 / year
Staphylococcus aureus	Absence in 10 g	2 / year
Pseudomonas aeruginosa	Absence in 10 g	2 / year

The compound Maize Starch is manufactured and released at approved suppliers. The compliance with the monograph is documented on the CoA of each delivery.

The microbiological properties of the product is specified and tested as follows:

Parameter	Limit	Frequency
Total aerobic microbial count (TAMC)	Max. 100 CFU/g	Every batch
Total combined yeast and mold count (TYMC)	Max. 50 CFU/g	Every batch
Escherichia coli	Absence in 10 g	Every 10 th batch
Salmonella spp.	Absence in 10 g	Every batch

Due to manufacturing procedure and hygiene measures it is confirmed that other microbiological parameters of the compounds defined in the monographs are also fulfilled by the final product. Furthermore, the following hygiene monitoring measures are installed:

- Environmental pathogen monitoring

- Monitoring of hand cleaning and disinfection

- Microbiological air analysis

- Water monitoring

The product is intended for oral application. Tests on endotoxin / pyrogen contamination are not conducted.
