Suitability as Ingredient in Food and Food Supplements

MEGGLE Product: StarLac®

The product is a spray-dried mixture of 85 parts Lactose and 15 parts Starch (maize) and is manufactured as excipients for pharmaceutical industry. The compounds conform to the relevant monographs in pharmacopoeias.

Lactose is the natural occurring sugar of milk (milk sugar) and is regarded as food (dairy product or sugar). It conforms to all relevant current EU and German food regulations.

The component is regarding the main chemical-physical characteristics in compliance with

- Codex Alimentarius Standard 212-1999
- Chinese Standard GB 25595-2018
- US Food Chemical Codex.
- US ADPI Product Standard
- US Standard of Identity 21CFR 186.122
- German Ordinance on Milk Products

(The component is not regarded as food additive. Therefore, JECFA and other food additive standards does not exist. An INS/E-number is not assigned.)

Starch is the natural occurring carbohydrate in maize and is regarded as food. It conforms to all relevant current EU and German food regulations. (The component is not regarded as food additive. Therefore, JECFA and other food additive standards does not exist. An INS/E-number is not assigned.)

The product can be used as compound ingredient in the production of food and for food supplement products. The both components has to be considered as "ingredients" of the final product. The use of the product for which food and food supplements regulations are applicable underlies the responsibility of the customer.

Best regards
